Topic: PicNet Online Project Management Tool (PPMT)

Presenter: Tim Gardner - PicNet Online Services Manager

Tim has five years experience in the Business Technology Consulting business. He has worked as a Senior Software Developer and Consultant for many top companies in Australia and New Zealand. Tim specialises in software architecture and enterprise-level design and development primarily in the medical, shipping and logistics fields. Tim holds three university qualifications from Otago University in Marketing, Management and Information Systems.

The purpose of this presentation is to introduce and get feedback on a new, simple to use Project Management tool. The PicNet Project Management Tool (PPMT) allows effective & economical project and risk management. Based on extensive collaboration, task, issue and risk management, the online, fully hosted, SSL enabled, utility based PPMT has been designed by experienced project managers with a successful track record. The PPMT offers users, project managers and administrators a simple, cost effective solution to the issue of task management for support teams or departmental staff.
