GROW YOUR SOFTWARE BUSINESS

AIIA together with **Microsoft** and the **Government of South Australia** is pleased to announce the **launch of South Australia.NET (SA.NET) Industry Development Cluster**. SA.NET is primarily designed to bring together local ICT organisations and promote South Australia as a world class location for software development.

Join **Brian Cunningham**, Chief Executive, Department of Trade and Economic Development, and your ICT industry colleagues to hear about SA.NET objectives and the benefits of membership.

Guest speaker **Peter Watson**, Director - Software + Services, Microsoft Australia, will give you a taste of the next wave from Microsoft and the exciting future ahead.

Join us to network with representatives of other like-minded SA companies using Microsoft technologies and identify skills and synergies, share knowledge and pool resources.

Take the first step to gain potential partnerships, joint tender opportunities, market intelligence, futures thinking and co-operative trade show participation, plus much more.

Microsoft®
