

COLLECTING DATA WITH TECHNOLOGY

Levels F-2

These series of lessons were created in collaboration with the Digital Technologies Specialist teacher from Mackay Christian College, Queensland.

Unit Overview

Coinciding with students being taught about biological science. They will collect data on the changes of meal worms and record these changes using iPads and the camera function. This lesson will be part of a Unit of Work that focuses on investigating how living things grow and change. The focus of these lessons to collect data and capturing changes of living and nonliving things. After the data collection process is complete, students will interpret their data and generate a range of statements. To present their data they will follow a sequence of steps to learn to use digital software programs. Students will choose an app and present their data to show the changes to the meal worms.

Other Curriculum Targeted Areas

Other curriculum areas can be targeted and assessed within this unit. Areas of interest may include:

- Mathematics – Data
- English – Reading
- Science Biological Science

Further investigation into these areas is required to ensure they align with the following activities. Activities may need to be modified to ensure content descriptions and achievement standards are met.

Australian Curriculum Alignment

The following sessions have been created using the Australian Curriculum: Digital Technologies Curriculum. Tasks may need to be modified to ensure state Digital Technologies Curriculum content descriptions and achievement standards are met. ACS has support and documents to help align this unit to other Digital Technology Curricula.

Session

'Session' has been used to define the order of tasks to complete the unit. It does not define a set time required to complete the task. Time allocated to complete a session is the teacher's discretion. This allows for flexibility for the teacher to drive the duration of the task and make modifications if necessary. Sessions can be merged into one set period or one session may run over multiple periods.

COLLECTING DATA WITH TECHNOLOGY

Levels F-2

Key Preparation

ACS Resources

Resources have been created to help teachers and students unpack and understand topics found within the Digital Technologies Curriculum. These give brief explanations of the topic and the expectations to teach the topic at the curriculum year level. It is intended the information is presented in a way that will set the foundation for further research.

You can access these resources via: <https://www.acs.org.au/ict-educators.html>.

Digital Systems

Some activities (learning to use iPads and Bee-bits) are included in this units. If digital devices are unavailable, modifications may need to occur to suit students/school and lessons. There are a range of Sequence of Steps activities found within out ICT Educators Community that can easily be replaced with those that are not applicable. To assist with modifying the sequence of steps for your school or students, we have set up and open file in Canva, access is [here](#).

Key Understandings

Students will:

- Collect data over the course of a selected time frame (at teacher discretion)
- Use a digital device to collect and represent the data
- Interpret the data they have collected.
- Identify the main hardware and software of an iPad.
- Create a sequence of steps to program a Bee-Bot to solve a simple problem.

Key Questions

- Why is it important to collect data?
- What data will you collect?
- How will you use a digital device/iPad to record your data?
- How will you use your digital device/iPad present your data?
- What have you found out by collecting the data?
- What are sequence of steps?
- What instructions do you need to follow to use different iPad apps?

Key Vocabulary

Data, data collection, sort, data representation, pictures, diagrams, images, predictions, interpretations, hardware, software sequence of steps, instructions, iPad, apps.

COLLECTING DATA WITH TECHNOLOGY

Levels F-2

Session Number	Session Focus	Learning Intention and Success Criteria	Introduction/Teacher Instruction	Whole Class Activity
1.	Sequence of Steps (taking a photo with the iPad)	<p>Learning Intention Students will identify and explain simple steps to use the iPad in classes.</p> <p>Success Criteria I can follow the instructions to take a photo on an iPad.</p>	Together read through and follow the sequence of steps to take a photo with the iPad.	<p>Students are provided with the sequence of steps out of order and they need to put them back into the correct order.</p> <p>Students then commence practicing following the instructions and taking photos with the iPad.</p>
Session Resources	<p>Student Resources</p> <ul style="list-style-type: none"> Taking a photo (out of order) – sequence of steps, located at the end of the unit. 		<p>Teacher Resources</p> <ul style="list-style-type: none"> Taking a photo (in order) – sequence of steps, located at the end of the unit. 	
2.	Data collection	<p>Learning Intention Students will represent data as images.</p> <p>Success Criteria I can use a camera to take a photo to collect data of my living thing changing.</p>	<p>Bring in a living thing (plant or small animal) as a stimulus for the lesson. Initiate a discussion about making prediction about what will happen to the living thing over one day, two days and even longer period of time. Steer the conversation about keeping record of the data the best way to capture the data.</p> <p>Use the whole class living object stimulus to model how to take photos and record observable changes.</p>	<p>Students will commence collecting data of how their living object has changed over time. They will take a photo of their object (daily, every second day). Ensure the collection of the data is occurred over a long period of time (at least couple of weeks to have observable changes).</p> <p>This session will occur multiple times for a duration depicted by the teacher.</p>
Session Resources	<p>Student Resources</p> <ul style="list-style-type: none"> 		<p>Teacher Resources</p> <ul style="list-style-type: none"> ACS Teacher Resource: Data

9.	Using technology for a purpose	<p>Learning Intention Students will explain the purpose of using the camera to collect data.</p> <p>Success Criteria I can explain why the camera was used as a purpose to collect data.</p>	Create a list of positive and negative reasons of using the camera to collect data. Discuss how the photos were taken and how they were saved.	Students create a short reflection (video or written) about why and how the camera was used purposefully to collect data. They identify and explain the software that they used to order their data.
Session Resources	Student Resources		Teacher Resources	
10.	Sequence of steps (Bee-Bots)	<p>Learning Intention Students will follow instructions to program a Bee-Bot.</p> <p>Success Criteria I can follow instructions to move and program the Bee-Bots.</p>	Introduce students to the sequence of steps activity sheet that explains how to use and program a Bee-Bot. Demonstrate and follow the instructions.	Do cut and paste of how to use the Bee-Bots. Students free play with the Bee-Bots, following the instructions to learn to program the Bee-Bot.
Session Resources	Student Resources		Teacher Resources	
	<ul style="list-style-type: none"> Using the Bee-Bot (out of order) - sequence of steps activity sheet, located at the end of the document. 		<ul style="list-style-type: none"> Using the Bee-Bot (in order) - sequence of steps activity sheet, located at the end of the document. 	

COLLECTING DATA WITH TECHNOLOGY

Levels F-2

Assessment – Australian Digital Technologies Curriculum			
Content Description	Session Number	Assessment Piece	Assessment Statement
Recognise and explore digital systems (hardware and software) components for a purpose (ACTDIK001)	9	Exploring digital systems to take photos	Students explored the hardware of a digital camera to take photos to collect data. They recognised through their reflection why the technology was used and how it benefited their data collection.
Recognise and explore patterns in data and represent data as pictures, symbols and diagrams (ACTDIK002)	1 & 2	Data collection	Students used software to digital represent data that depicted growth and change of living things.
Collect, explore and sort data, and use digital systems to present the data creatively (ACTDIP003)	8	Digital presentation of their data	Students collated data to demonstrate how living things grow and change. They used cameras on a digital device to collect photos.
Following, describe and represent a sequence of steps and decisions (algorithms) needed to solve simple problems (ACTDIP004)	3-6	Sequence of steps recorded in correct order and following sequence of steps	Students followed and described a simple sequence of events to learn how to use a selection of apps on the iPad.
Explore how people safely use common information systems to meet information, communication and recreation needs (ACTDIP005)	N/A		
Create and organise ideas and information using information systems independently and with others, and share these with known people in safe online environments (ACTDIP006)	6	Learning to use SeeSaw	Students followed a sequence of steps to learn how to use SeeSaw and shared their work with their class.

Content Description	Session Number	Assessment Piece	Assessment Statement
Identify and explore digital systems (hardware and software components) for a purpose (VCDTDS013)	9	Exploring digital systems to take photos	Students explored the hardware of a digital camera to take photos to collect data. They recognised through their reflection why the technology was used and how it benefited their data collection.
Recognise and explore patterns in data and represent data as pictures, symbols and diagrams (VCDTDI014)	1 & 2	Data collection	Students used software to digital represent data that depicted growth and change of living things.
Collect, explore and sort data, and use digital systems to present the data creatively (VCDTDI015)	8	Digital presentation of their data	Students collated data to demonstrate how living things grow and change. They used cameras on a digital device to collect photos.
Independently and with others create and organise ideas and information using information systems, and share these with known people in safe online environments (VCDTDI016)	6	Learning to use SeeSaw	Students followed a sequence of steps to learn how to use SeeSaw and shared their work with their class.
Follow, describe and represent a sequence of steps and decisions (algorithms) needed to solve simple problems (VCDTCD017)	3-6	Sequence of steps recorded in correct order and following sequence of steps	Students followed and described a simple sequence of events to learn how to use a selection of apps on the iPad.
Explore how people safely use common information systems to meet information, communication and recreation needs (VCDTCD018)	N/A		

COLLECTING DATA WITH TECHNOLOGY

Levels F-2

Assessment – New South Wales Science and Technology Syllabus			
Outcomes and Objectives	Session Number	Assessment Piece	Stage Statement
observes, questions and collects data to communicate and compare ideas (ST1-1WS-S)	Over the course of the unit	Interpretation of data	Students observed the changings of living things and compared these to nonliving things. They collected data to help them make valid conclusions and they communicated these ideas with their peers.
collect, sort, organise and present data to communicate information (ACTDIP003)	1 & 2	Data collection	Students collated data to demonstrate how living things grow and change. They used cameras on a digital device to collect photos. Students used software to digital represent data that depicted growth and change of living things.
Identifies digital systems and explores how instructions are used to control digital devices (ST-e7DI-T)	9	Exploring digital systems to take photos	Students explored the hardware of a digital camera to take photos to collect data.

COLLECTING DATA WITH TECHNOLOGY

Levels F-2

Assessment – Western Australian Digital Technologies Curriculum			
Year 1 Syllabus			
Content Descriptions	Session Number	Assessment Piece	Assessment Statement
Digital systems (hardware and software) are used in everyday life and have specific features (ACTDIK001)	9	Exploring digital systems to take photos	Students explored the hardware of a digital camera to take photos to collect data. They recognised through their reflection why the technology was used and how it benefited their data collection.
Data can have patterns and can be represented as pictures, symbols and diagrams (ACTDIK002)	1 & 2	Data collection	Students used software to digital represent data that depicted growth and change of living things.
Present data of any kind using a variety of digital tools (ACTDIP003)	1 & 2	Data collection	Students used software to digital represent data that depicted growth and change of living things.
Use data to solve a simple task/problem (ACTDIP003)	1 & 2	Data collection	Students used software to digital represent data that depicted growth and change of living things.
Share and publish information with known people in an online environment, modelling strategies to stay safe online (ACTDIP006)	6	Learning to use SeeSaw	Students followed a sequence of steps to learn how to use SeeSaw and shared their work with their class.
Explore opportunities for design (WATPPS06)	N/A		
Develop and communicate design ideas through describing, drawing, modelling and/or a sequence of written or spoken steps (WATPPS07)	3-6	Sequence of steps recorded in correct order and following sequence of steps	Students followed and described a simple sequence of events to learn how to use a selection of apps on the iPad.
Use given components and equipment to safely make solutions (WATPPS08)	3-6	Sequence of steps recorded in correct order and following sequence of steps	Students followed and described a simple sequence of events to learn how to use a selection of apps on the iPad.
Use personal preferences to evaluate the success of design processes (WATPPS09)	N/A		
Work independently, or with others when required, to create and safely share sequenced steps for solutions (WATPPS10)	6	Learning to use SeeSaw	Students followed a sequence of steps to learn how to use SeeSaw and shared their work with their class.

COLLECTING DATA WITH TECHNOLOGY

Levels F-2

Assessment – Western Australian Digital Technologies Curriculum			
Year 2 Syllabus			
Content Descriptions	Session Number	Assessment Piece	Assessment Statement
Digital systems (hardware and software) are used for an identified purpose (ACTDIK001)	9	Exploring digital systems to take photos	Students explored the hardware of a digital camera to take photos to collect data. They recognised through their reflection why the technology was used and how it benefited their data collection.
Data can have patterns and can be represented and used to make simple conclusions (ACTDIK002)	8	Digital presentation of their data	Students collated data to demonstrate how living things grow and change. They used cameras on a digital device to collect photos.
Present data using a variety of digital tools (ACTDIP003)	8	Digital presentation of their data	Students collated data to demonstrate how living things grow and change. They used cameras on a digital device to collect photos.
Use data to solve similar tasks/problems (ACTDIP003)			
Share and publish information in a safe online environment, with known people (ACTDIP006)	6	Learning to use SeeSaw	Students followed a sequence of steps to learn how to use SeeSaw and shared their work with their class.
Explore design to meet needs or opportunities (WATPPS11)	N/A		
Develop, communicate and discuss design ideas through describing, drawing, modelling and/or a sequence of steps (WATPPS12)	N/A		
Use components and given equipment to safely make solutions (WATPPS13)	Throughout the unit	Using different apps	Students learnt to use a selection of apps to create a presentation of the growth of their meal worm.
Use simple criteria to evaluate the success of design processes and solutions (WATPPS14)	N/A		
Work independently, or collaboratively when required, to organise information and ideas to create and safely share sequenced steps for solutions (WATPPS15)	6	Learning to use SeeSaw	Students followed a sequence of steps to learn how to use SeeSaw and shared their work with their class.

SEQUENCE OF STEPS: USING AN IPAD

STEP 1

Carry with 2 hands.

STEP 2

Disconnect earphones.

STEP 3

Sit down on the mat when using the iPad.

STEP 5

Turn off the screen when the teacher is talking.

STEP 4

Only use apps directed by the teacher.

SEQUENCE OF STEPS: TAKING A PHOTO ON AN IPAD

STEP 1

Open the Camera.

STEP 2

Make sure the image is clear.

STEP 3

Hold the iPad still with one hand.

STEP 5

Take 1 photo only.

STEP 4

Press the white button to take a photo.

SEQUENCE OF STEPS: USING BOOK CREATOR

STEP 1

Tap on the app to open Book Creator.

STEP 2

Tap on the + add features to your book.

STEP 3

Press the microphone to add a sound.

STEP 4

Press the camera to add a picture.

STEP 5

Press the home button to exit the app.

SEQUENCE OF STEPS: USING CLIPS

STEP 1
Tap on the app
to open Clips.

STEP 2
Press and hold
the pink button
to record a
video.

STEP 3
Press the round
circle to take a
photo.

STEP 5
Press the
triangle to play
your video.

STEP 4
Press the
coloured star to
add effects.

SEQUENCE OF STEPS: KEYNTOE

STEP 1

Tap on the app to open Keynote

STEP 2

Double tap the slide to edit it.

STEP 3

Add text.

STEP 5

Press play to present your presentation

STEP 4

Add photos.

SEQUENCE OF STEPS: USING SEESAW

STEP 1

Tap on the app to open Seesaw.

STEP 2

Press the green Add button.

STEP 3

Choose pencil.

STEP 5

Press the green tick.

STEP 4

Choose Photo
Drawing or
Video.
